State+Local/Private	\$1.25	\$1.23	\$1.31	\$1.29	\$1.23	\$1.22	\$1.30	\$1.29

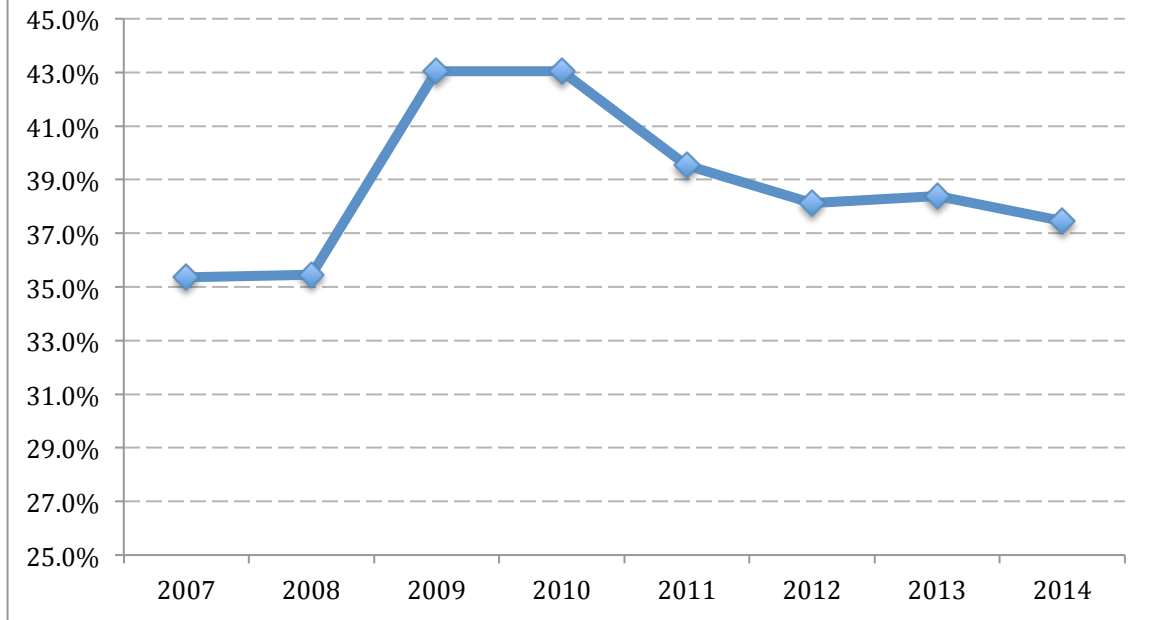

Personal Income, Per Employee, Comparison Private-Government

For every dollar an average private-sector employee makes in Wyoming, an average state government employee has made between \$1.30 and \$1.38 over the period 2007-2014.

If we add local-government employees, the “bonus” for working in state or local government has been in the \$1.22 - \$1.31 interval.

State spending, share of private personal income

If you, the average private-sector employee, had to pay for state government directly out of your personal income, how high would the tax have to be?
